Release Notes for L-P-SDRD Version 1.7
As of August 8, 2005

System Area	Description of the Change
On batch data upload page, add a check box to indicate if this year's projects need to be linked back to last year's projects by projectID. If checked, projects are automatically linked to the last year's project unless XML lastFY_projectID field has data. If not checked, same as last year, projects will only be linked by lastFY_projectID.	This function helps speed up S-P-LDRD batch data upload process by eliminating repeats the lastFY_projectID in the batch upload file when it's the same as current year's projected.
